

## Tower Speaker 200

### Bring the Movie Theater Experience Home

#### *Tower Speakers surround you with high-resolution sound.*

Nothing brings friends and family together like home theater. And there's no better way to share your favorite movies than in the comfort of your own home with intense, powerful sound that brings it all to life. Working within Monster's innovative line of high-performance THX™ Select™ Certified home theater speakers, Monster® Towers operate as left and right, front and rear full-range channels to deliver intense, 5.1 surround sound audio while complementing your existing décor.

#### *Advanced engineering delivers full-range audio in one sleek unit.*

From the detailed highs of phaser fire to the thunderous lows of a dinosaur's roar, Monster Towers reproduce mid-range, high, and low frequencies for incredibly realistic sound with a wider soundstage and deeper bass extension. Monster spent countless hours of critical listening to ensure designs met stringent Monster standards for audio quality and could surpass requirements for THX Select certification. A Neodymium silk dome tweeter draws you in, while three 7" Kevlar® drivers seduce you with sound so staggering you may never leave the couch.

#### *Classic visual details complement your existing décor.*

Say goodbye to the aesthetically-offensive black box. Monster Towers look as stunning as they sound. Streamlined designs feature curved lines, black accents and a high-gloss deep cherry or piano black finish to complement your décor. Designed to coordinate beautifully with THX Select Certified Monster Monitors, Bass Modules, Dipoles and Subwoofers, as well as M•Design™ Cinerama™ Component Centers, they create a stylish, integrated home theater ensemble your family will love.

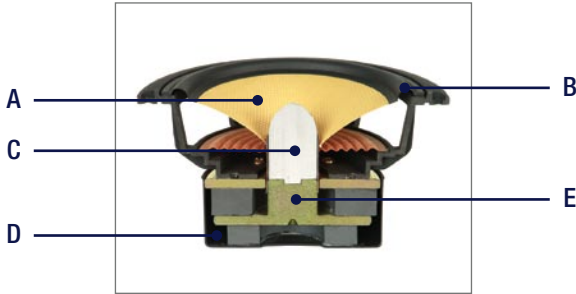

#### *Powerful performance. Timeless style.*

**Monster THX Select Certified Speakers.**

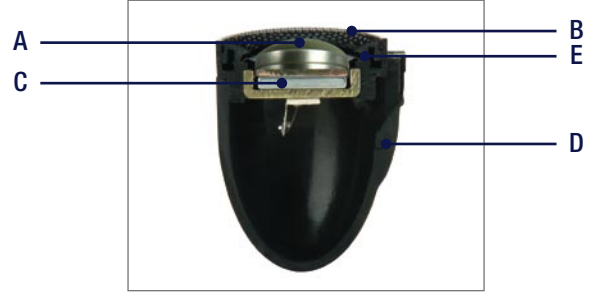

*Three 7" Kevlar® mid-bass drivers deliver incredibly realistic sound with a wider soundstage and deeper bass extension. (speaker shown with grille removed)*
